

Cheque book Module:

Manual Testing:

- Testers manually request and verify cheque book issuance, track cheque numbers, and validate transactions.
- Prone to oversight, especially in tracking multiple cheque numbers.

Automated Cheque book Module:

With the help of selenium python and customize framework

- Automated tests emulate cheque book issuance, track cheque numbers, and validate cheque-related transactions.
- Selenium Python scripts adhere to TDD principles and are part of the framework.
- Increases accuracy in tracking cheque book status and verification of transactions.
